

# Link

The solution with specific technology  
to provide the perfect heating.

maximum accuracy  
thanks to temperature  
electronic control

algorithm developed  
to avoid product  
dehydration

specific deck  
for the best quality heating:  
Bakingstone

## Main Features

Link represents the necessary connection for a complete solution. It's the first heater with smart technology: it boasts temperature electronic control thanks to two probes (max 280°), independent managing of two chambers with separate control panel and a special algorithm developed to extract the right amount of product humidity. The Bakingstone deck allows a perfect heat distribution across the entire surface making Link extremely suitable both for direct or in tray heating. Thanks to its compact dimensions (L60 x P58 x H42 cm) Link can be perfectly integrated in any kind of setting.

## Technical Features

- Electronic management of temperatures
- Independent adjustment of baking chambers
- Maximum temperature 280°C
- Maximum power 3 kW
- Standard power supply V230 1N 50/60 Hz
- Ext. dim.: L60 x P58 x H42 cm
- Int. dim. (baking chamber): L41 x P41 x H10 cm
- Weight: 43 kg
